PROFESSIONAL SUMMARY

Final-year Computer Science student with proven hands-on experience in full-stack development. Successfully delivered 2 production-ready applications using modern technologies (Node.js, Express.js, Electron.js, Tauri). Demonstrated ability to solve real-world technical problems through freelance IT support work. Strong foundation in both frontend and backend development with a focus on creating practical, user-centered solutions.

EDUCATION

Universitas Panca Sakti Bekasi

Bachelor of Computer Science (Teknik Informatika) | Expected Graduation: 2026-2027

- Currently in 8th Semester | GPA: 3.6/4.0

SMA Negeri 1 Karang Bahagia

High School Diploma – Social Sciences | Graduated: 2020

TECHNICAL SKILLS

JavaScript

HTML/CSS

Node.js

WebSocket

Windows / Ubuntu

System Troubleshooting

Data Backup & Recovery

♥ PERSONAL SKILLS

Fast Learner

Adaptable

Problem-Solving

Effective Communication

Team Collaboration

Time Management

📁 WORK EXPERIENCE

IT Support & Troubleshooting Specialist (Freelance)

December 2025

Multiple Companies

- Successfully diagnosed and resolved critical bootloop issues on office PCs for 2 different companies
- Performed complete data backup and system recovery, ensuring zero data loss for critical business files
- Executed clean OS reinstallation and system configuration, restoring full functionality within same-day turnaround
- Provided post-installation support including software setup and user training

📁 PROJECTS & PORTFOLIO

📱 Aplikasi Penilaian Siswa SD (Elementary School Grading App)

Nov – Dec 2025

Tauri v2, Rusqlite (SQLite), JavaScript | Community Service Project (KKN) - Full-Stack Developer

- Developed a desktop application to streamline student grade management for elementary school teachers, replacing manual record-keeping processes
- Implemented comprehensive CRUD operations for student data and grades with embedded local database (Rusqlite)
- Built intelligent Excel import feature with automatic table mapping to handle various spreadsheet formats
- Designed advanced filtering system by class and academic year with search functionality for student names and NIS/NISN
- Created automated graduation certificate printing feature to expedite administrative workflows

Tauri v2

SQLite

JavaScript

Excel Import

Arduino Uno, RFID Reader, Node.js, Electron.js, WebSocket, SQLite | Backend Developer (Backend Logic & Arduino Programming)

- Developed a desktop application to automate employee attendance tracking using RFID technology
- Programmed Arduino Uno to read RFID cards and transmit data via serial communication to the main application
- Built real-time data communication system using Node.js backend with WebSocket protocol
- Designed and implemented SQLite database schema for storing and querying attendance records
- Created interactive desktop interface using Electron.js for attendance monitoring and reporting
